

**DIGITAL SIGNAGE-CONTENT CONTROL PANEL(ECP-04)/AIR MOUSE**

The content to be fed to the LCD displays can either be selected by the ECP-04 control panel which connects to the main digital signage server via the local internet network or by an air-mouse through the GUI on the LCD which is connected to the Mini-PC/Raspberry via a Wi-Fi dongle. ECP-04 has 8 pre-set buttons to choose one of the 8 different streams of information from the server to be displayed on the corresponding LCD. There is also a joystick and 8 indicator lamps to easily choose the desired stream on the panel. Live connection to the server and command signal triggers also use dedicated indicator lamps for monitoring the functions of the panel.

**Technical Specifications:**

Weight	ECP-04: 126 g Air-Mouse: 72 g
Dimensions	ECP-04: W:230 mm H:80 mm D: 45 mm
	Air-Mouse: W: 140mm H: 47 mm Ø7 mm
Raw Material	ECP-04 Polycarbonate + ABS Air-Mouse: ABS
Color	ECP-04: White Air-Mouse: Black
Power Supply	ECP-04: 5 V/2A Air-Mouse: 2 x AAA Alkaline Batteries
Port	ECP-04: RJ45 Air-Mouse: WiFi Dongle
Operating Temperature	-10°C ~ +50° C
Operating Humidity	30% ~ 80% RH
Mounting	ECP 04: Flush Air-Mouse: Portable
