

EMERGENCY CODE CALL – SMS GATEWAY (SMGW01)

The SMS gateway connects the LAN network to mobile (cellular) network. The Emergency calls initiated from different methods are sent to mobile phones of the related staff by this module through Short Message Service of local mobile service provider. Also, the authorized staff can initiate an emergency code call by sending a short message (SMS) to the SIM card installed in SMGW01 module and the code call will be transmitted to other staff by all available methods.

Technical Specifications:

Weight	175 g		
Dimensions	W:202 mm	H:77 mm	D:45 mm
Raw Material	ABS		
Color	White		
Power Supply	5 V / 3 A		
Frequency Bands	850, 900, 1800 and 1900 MHz (Quad-band)		
Port 1	RJ45 (LAN)		
Port 2	SIM card(Standard Size)		
Operating Temperature	-10°C ~ +50° C		
Operating Humidity	30% ~ 80% RH		
Mounting	Surface
