EMERGENCY CODE CALL - PAGER

The 2-way pager used in the Emergency code calling system is capable of launching a code call and a presence signal after a code has been taken care of.

It can launch any of the 12 codes defined on the system through its menu which is set by the main server of the emergency code call system.

KTC also offers the one-way waist/wrist pagers if calling a code/Presence from the pager can be ignored by the customers.

Min. System Requirements:

Weight	98 g
Dimensions	W: 90 mm H:60 mm D: 20 mm
Raw Material	ABS + Plexiprint
Color	Black
Power Supply	5V /2A Battery Charging
Display Type	OLED 128 x 64 2.42 inch
Battery Type	Lithium 3.7 V/1600 mA Rechargeable Battery
Port 1	Micro-USB (Battery charging/Setting)
Internal Buzzer	Yes
Wireless Range	Max 200 meters depending on the architecture
Wireless Frequency	433 MHz
Operating Temperature	-10°C ~ +50° C
Operating Humidity	30% ~ 80% RH
Mounting	Portable
