

INFOTAINMENT SYSTEM-MAIN SERVER

This is the main server connecting the Hospital Information Service (HIS) to the infotainment System. It also connects to the Mini-PC to manage the content of the infotainment system of the facility via the local network.

The stream of T.V./Satellite programs to each batch of 40 LCDs is made possible using the Multi-tuner DVB-S/DVB-T cards.

The main software of the infotainment system is installed on this server to manage the system.

Server

Technical Specifications:

Operating System	Windows 10
H.D.D.	Min. 1T GB - SSD
RAM	Min 16GB
Special Hardware	Ethernet Port
Processor	Min Core i5 or equivalent
