

**INFOTAINMENT SYSTEM-WORKFLOW TERMINAL**

This terminal shows the patients in a room with particulars for each one derived from the Hospital Information System (HIS). The physicians can check information like the results of different imaging or laboratory departments in the facility on the terminal and add additional instructions to the patient workflow which if needed will be broadcast to the relevant departments or personnel via the emergency code calling integrated system (Pagers, Speakers, Displays, Mobile Short Message services, etc.). The physicians or nurses can access or modify the information on the workflow terminal only by presenting their RFID card.

**Technical Specifications:**

Weight			
Dimensions	W:200 mm	H: 200 mm	D: 35 mm
Raw Material	Polycarbonate + ABS		
Color	White		
Power Supply			
Port			
Operating Temperature	-10°C ~ +50° C		
Operating Humidity	30% ~ 80% RH		
Mounting	Surface Mount
