

SMART NCS-STAFF DISPLAY UNIT (NDP-31)

NDP-31 is the display unit installed in the management center. It is used to display the room & bed number initiating the Nurse Calls.

The Alarm for a new call is played by an internal speaker with melodies stored on a local Micro-SD card.

The content of NDP-31 is provided by the staff console (CUI-32) via local network and it can display the highest priority call in a queue of maximum 64 calls.
