

WIRELESS NCS-STAFF DISPLAY UNIT (K-USB)

K-USB is a Seven-segment display unit installed in the management center as the Wireless staff console of Wireless Nurse Call System. It is used to display the number associated to the calling unit to management staff.

The Alarm for a new call is played by an internal speaker and a reminder can be set to repeat the alarm in predefined intervals.

K-USB has a queue management on 400 incoming calls and displays the first 3 calls in chronological order. The display shows the current time when there is no active call present.

Technical Specifications:

Weight	588 g		
Dimensions	W: 280 mm	H: 150 mm	D: 35 mm
